www.saveto.com

Vetonit, Saveto's flagship brand, is a market leader in construction chemicals and finishing materials across the MENA region. It offers advanced solutions for flooring, waterproofing, roofing, tiling, walls and façades, and thermal insulation, among others.

Designed to meet the region's unique environmental and construction demands, Vetonit supports high-quality, sustainable building across commercial, industrial, residential, educational, high-rise, and infrastructure sectors.

Our Solutions: Concrete Repair | Walls and Facades | Flooring | Surface Treatment and Finishes | Tiling | Waterproofing | Plasters and Masonry | Protective Coatings | Bonding Agents and Primers | Thermal Insulation | Accessories and Ancillaries | Sealants and Joints | Sports | High Precision Grouts

Tile Adhesives

Vetonit
Premium Fix

A cement-based adhesive specially designed for ceramic tiles, water and weather-resistant, with superior bonding strength to most types of ceramic tiles in indoor applications.

Vetonit
Ceramic Tile Fix

High-quality cementitious adhesive offering strong slip resistance, designed for the installation of all types of ceramic tiles. Suitable for internal applications in both wet and dry conditions.

Vetonit
Ultra

A premixed, cement-based, weather-resistant, multipurpose dry-set tile adhesive for ceramic tiles, marble, terrazzo tiles, and Riyadh stone. It can be used internally or externally.

Vetonit
Porcelain Tile Fix

High-quality weather-resistant cement-based adhesive specially designed for porcelain tiles. It can be used in wet or dry areas and is suitable for application on horizontal and vertical surfaces, both indoors and outdoors.

Vetonit
Porcelain Plus

High-quality, highly flexible, cement-based adhesive designed specifically for large porcelain slabs. It is designed to be used in wet or dry areas and is suitable for application on horizontal and vertical surfaces, both internally and externally.

Vetonit
Marble Max

High-quality, easy to use, cement-based tile adhesive with exceptional flexibility and bonding strength, designed for installing various types of marble.

Vetonit
Pool Fix

High-quality, water-resistant, cement-based adhesive used for all types of tiles in submerged areas such as swimming pools, and fountains.

Tile Grouts

Bonding Agents and Primers

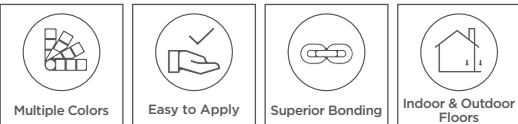

Vetonit
Tile Grout

Multipurpose, weather-resistant tile grout used for grouting joints on walls and floors, suitable for grouting the joints of various tile types

Vetonit
Grout Fine

High-quality cementitious tile grout specially designed for filling narrow tile joints, including porcelain tiles. Suitable for both wall and floor applications, it offers low water absorption and high resistance to scratching and abrasion.

Vetonit
Grout Pure

High-performance, non-absorbent grout suitable for all tile types. It is wear-resistant, dirt and dust-repellent, easy to clean, and provides a smooth finish. It is suitable for grouting tile joints on walls and floors, in both dry and wet areas, for indoor and outdoor use.

Vetonit
Pool Grout

Specially designed swimming pool tile grout for submerged tile joints. It is highly water-resistant, which makes it ideal for grouting tile joints on walls and floors in pools and other wet areas.

Vetonit
Bond Pure

A highly concentrated, high-quality, multipurpose, bonding agent and admixture, designed to enhance adhesion and improve the mechanical properties of cementitious mixes. Its thixotropic nature helps reduce surface water loss, minimizing shrinkage cracks during the early stages of hardening. As an admixture, it improves the performance of plasters, lime/sand cement screeds, renders, mortars, and grouts.

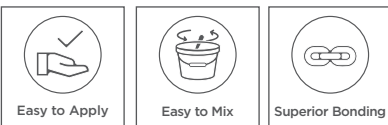

Vetonit
Bond 2

A high-quality, multipurpose bonding agent and admixture for cementitious materials. It can be applied by spray or brush to substrates to improve the bonding of plasters, mortars, and cementitious patching.

Vetonit
Plastering Bond

Bonding agent and admixture, specifically designed for use as an admixture with all types of plaster and render.

Surface Treatments and Finishes

Surface Treatments and Finishes

Vetonit Putty Fine

A pre-mixed, easy-to-apply compound designed to level minor undulations and minor undulations on smooth and fine concrete surfaces, as well as wooden. It is ideal for interior applications over Vetonit Putty WR before the painting stage.

High Coverage

High Performance

Walls and Ceilings

Easy to Apply

Vetonit Putty Fine Extra

A premium, water-based putty known for its exceptional quality and smooth finish. Supplied ready-to-use in pre-weighed pails, it repairs surface undulations and creates an ideal base for paint and decorative coatings.

High Coverage

High Performance

Walls and Ceilings

Easy to Apply

Vetonit Vetogyps Compound

Pre-mixed final finishing compound, used as a final finishing layer over interior gypsum and cement surfaces.

Suitable for Wet and Dry areas

Saving Effort

Superior Bonding

Walls and Ceilings

Vetonit Crack Filler

High-quality compound for filling and sealing cracks, and leveling surface undulations on walls and ceilings in both wet and dry areas.

Superior Bonding

High Coverage

Easy to Apply

Water-resistant

Vetonit Gypsum Joint Compound

Smooth, high-quality filler used internally to treat and finish the joints between gypsum boards, whether for ceilings or walls. Suitable as a final finishing layer for use as a final finishing layer over dry gypsum and cement surfaces, and is characterized by high flexibility and crack resistance.

Superior Bonding

Self Drying

Walls and Ceilings

Easy to Apply

Vetonit Finish WR

Smooth, water-resistant, cement-based coating, suitable for use in both wet and dry areas. Designed for interior use, it levels minor surface undulations on smooth and fine concrete surfaces and can be applied to both horizontal and vertical surfaces.

High Coverage

Superior Bonding

Easy to Apply

Water-resistant

Vetonit Putty WR

High-quality, water-resistant putty designed to level the undulations on concrete or smooth surfaces. Suitable for wet and dry areas.

High Coverage

Superior Bonding

Easy to Apply

Water-resistant

Vetonit Thick Render

Cementitious, water-resistant thick patching and repair render. Supplied as a ready-to-use dry powder for on-site mixing with clean water. Formulated with shrinkage-control additives, it is ideal for thick patch repairs and rendering applications, particularly in coastal environments.

Suitable for Wet and Dry areas

Superior Bonding

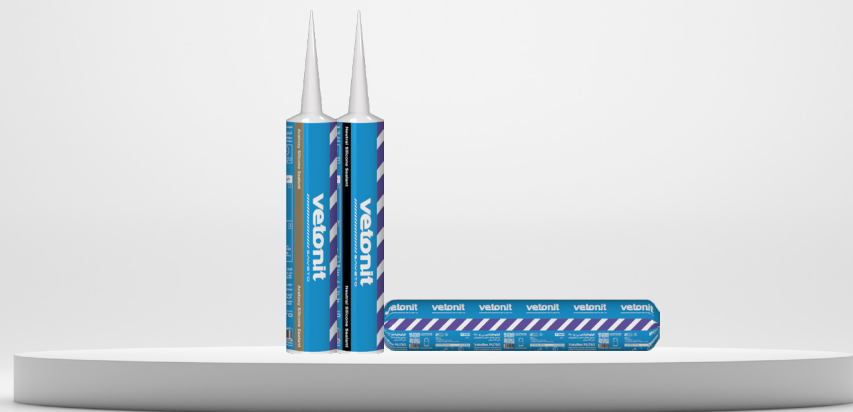

Indoor and outdoor

Effort saving

Waterproofing

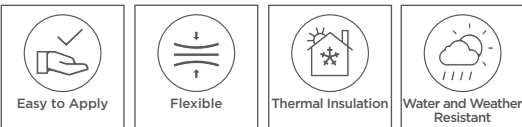

Sealants and Joints

Vetonit
Vetoproof AZL

A waterproofing and protective coating based on hybrid polyurethane technology. Vetoproof AZL is flexible, durable, and UV-resistant. The product is white in color with a high Solar Reflective Index (SRI), ensuring better thermal roof insulation.

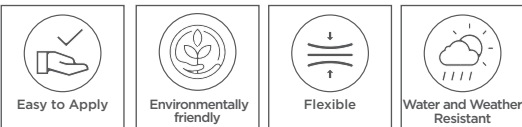

Vetonit
Vetoflex SA786

A single-component, moisture-cured acid-curing silicone sealant with fungicide. It cures at room temperature to form a flexible, medium modulus watertight joint for general sanitary sealing.

Vetonit
Vetoproof TOP

A flexible acrylic copolymer-based elastomeric waterproofing membrane. It offers excellent long-term waterproofing characteristics and resistance to UV degradation while remaining flexible for superior crack-bridging ability.

Vetonit
Vetoflex SN787

A single-component, neutral curing, antifungal, ready-to-use silicone elastomer. It cures quickly at room temperature in the presence of air moisture to give a flexible and strong seal. It has exceptional appearance retention, superior durability, and outstanding adhesion strength, it remains reliable over extended periods. Ideal for use in a wide range of weather conditions.

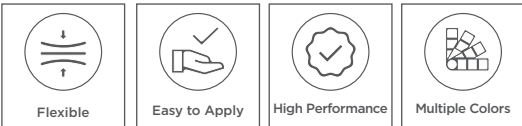

Vetonit
Vetoproof S

A cement-based, highly flexible and crack-resistant waterproofing coating, specially treated for enhanced performance. Ideal for waterproofing bathrooms, kitchens, swimming pools, and water tanks.

Vetonit
Vetoflex PU780

A high-performance, single-component, elastomeric polyurethane sealant that cures with moisture to provide a water-resistant, low-modulus joint seal. It is designed for movement and connection joints in both indoor and outdoor environments. Once cured, it is weather-resistant and paintable, making it a versatile solution for sealing and bonding a wide range of construction materials such as concrete, steel, and wood.

Plasters and Masonry

Wall and Façade

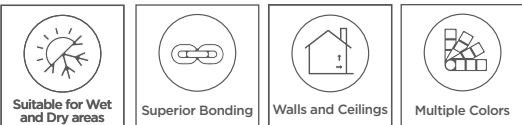

Vetonit
**Liyassa Premix
Plaster S**

Sprayable cementitious premixed plaster/render supplied as a ready-to-use dry powder for on-site mixing with clean water. Designed primarily for spray machine application, it can also be applied manually. Formulated with shrinkage-control additives, it provides excellent adhesion and a uniform, consistent finish.

Vetonit
**Vetotouch
Décor MB**

Flexible, ready-to-use, medium-build textured decorative coating based on acrylic emulsion for interior and exterior applications. Provides a durable, weather-resistant matt textured finish.

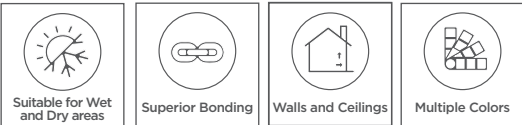

Vetonit
Plaster Mix M

Manual-applied cementitious premixed plaster supplied as a ready-to-use dry powder for on-site mixing with clean water. It provides excellent workability and adhesion. Ideal for areas inaccessible to spray machines, it is designed for application in layers from 5 to 20 mm per coat.

Vetonit
**Vetotouch
Serene**

A polymer-modified cementitious decorative finish coat (1-3 mm) supplied as a ready-to-use dry powder for on-site mixing with clean water, producing an easily workable mortar suitable for creating durable decorative finishes.

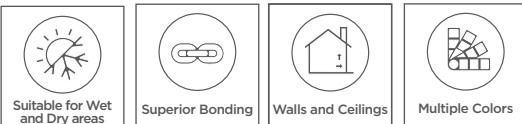

Vetonit
Spatter Dash SB

High-performance, cementitious scratch coat (key coat) supplied as a ready-to-use dry powder for on-site mixing with clean water. It produces an easily sprayable mortar with enhanced bonding properties, providing an ideal key for subsequent plaster applications.

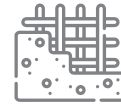

Vetonit
**Vetotouch
Monocouche**

A UV-resistant pigmented cementitious premixed plaster supplied as a ready-to-use dry powder for on-site mixing with clean water, producing a cohesive mortar that provides a durable, decorative finish for exterior applications.
